

GOLDBERG & KRIEGER
BOARD CERTIFIED PLASTIC SURGEONS

ANDREW G. GOLDBERG, M.D., F.A.C.S. • MITCHEL D. KRIEGER, M.D., F.A.C.S.

TATTOO REMOVAL AFTERCARE INSTRUCTIONS

- Tattoos treated with a laser will in most cases either blister or scab after treatment.
- Wash treated areas as you normally would with soap and water. Keep the area clean and protected with light dressings.
- Apply your favorite antibiotic ointment or Vaseline two to three times daily until it has healed. Always use a clean cotton swab and not your fingertips.
- No Jacuzzi, swimming chlorine pools or in the ocean for seven to 10 days or until the treated area is completely healed.
- Protect the treated area from sun and apply sunscreen if exposed. Use sunscreen with an SPF of at least 30.
- Return to the office for repeat treatment in six to eight weeks or as directed by your physician.
- Please call the office at 703-264-0904 if you have any questions or concerns.
